| <b>D. Interfacing</b> | Cut 2 @ 10 x 6 1/2" |
|-----------------------|---------------------|

**Sample Cutting Layout:** Cut on single layer of fabric, **WRONG** side up. Shaded pieces indicate that pattern piece should be reversed (flip pattern piece over and trace).

**PREPARE ZIPPER:**

Cut a 1 x 1 1/2" piece from Fabric #1. Fold in half to 1 x 3/4".

Position on zipper tape above top zipper stop so folded end is facing toward zipper. Edgestitch along folded and side edges. Trim to width of zipper.

**CREATE BAG:**

1. Cut 4 - 10" pieces of bias tape. Determine the shorter side of the bias tape.

2. Open center fold and shorter side fold. Align raw edge of bias tape with curved edge of **B** panel. Stitch along short side fold.

3. Wrap bias to **WRONG** side of panel to encase raw edge. Press. From **RIGHT** side, stitch in the ditch; catching bias tape on **WRONG** side in seam.

4. Layer **B1** **RIGHT** side up on **RIGHT** side of **A**. Align left bottom corners and left side edges. Edgestitch curved edge of **B1** and baste side and bottom edges.

5. Repeat step #4 to attach **B2** to right-hand side of **A** panel.

6. Repeat steps #2 and #4 with the second set of **B1, B2 & A**.

7. Lay zipper face down on **RIGHT** side of **A**, aligning edge of zipper tape and top edge of **A**.

8. Lay **C** **RIGHT** side down on **RIGHT** side of **A**; sandwiching zipper between **A & C**. Align top edges. Using a zipper foot, stitch along zipper at top edge.

9. With WRONG sides together, align side and bottom edges of **A & C**; press seam. Topstitch 1/8" from seam. Repeat steps #6 and #8 with second **A & C** panels to free edge of zipper.

10. Open to expose zipper. Panel should look like the following:

### SQUARE CORNERS

11. Open zipper  $\frac{3}{4}$  of the way. Align bottom and side edges of **A** panels with **RIGHT** sides together. Sew side and bottom edges.

12. Flatten one bottom corner of **A** so that the bottom and side seam lines are in the center (look inside bag; match up side and bottom seams). Open seam allowances; pin.

13. Measure down from point 1/2". Draw a horizontal line. Sew along line.

14. Trim off point 1/4" from seam line. Repeat steps #12-13 on second corner.

15. Align bottom and side edges of **C**. Sew sides and bottom edges, leaving a gap in seam line for turning.

16. Repeat steps #12-13 with **C** panels.

17. Trim seam allowances on both ends of zipper and at each corner without cutting into seam lines. Turn bag **RIGHT** side out through opening in **C**. Tuck seam allowance of opening inside and slip-stitch or topstitch closed. Arrange **C** inside of exterior; press. Enjoy!

I hope you had fun making this project! I would love to see your creation! Email me your photos at [cozynestinfo@cox.net](mailto:cozynestinfo@cox.net) and I will display them on my Facebook wall and Flickr!

Thanks so much!

Sarah
